AI-assisted product builder and BYU Information Systems student with experience translating user needs into useful tools, leading cross-cultural operations, and supporting adoption in healthcare and international development. Focused on practical workflows, product judgment, and verifiable results.

EDUCATION

Bachelor of Science: Information Systems **Apr 2028**
Artificial Intelligence & Product Management Focus | Minor in Chinese | STEM-Designated Technical Program
Brigham Young University - Marriott School of Business, Provo, UT

- GPA: 3.9
- Relevant Coursework: Business Programming, Database Systems, Project Management & Systems Design, IT Infrastructure

TECHNICAL SKILLS

Artificial Intelligence (AI): Codex, ChatGPT, LiveKit, AI-assisted application development, workflow automation
Development & Cloud: Python, TypeScript, JavaScript, SQL, React, HTML/CSS, Supabase, Microsoft Azure

PROJECT EXPERIENCE

- Contributed the LiveKit voice-interview flow and Cloudflare integration to a team career-exploration platform for college students (2026)
- Built AI-assisted portfolio demos for field operations, bilingual revenue tracking, time tracking, and screen-time competition; documented security and verification limits (2026)

EXPERIENCE

Research Assistant | Field Operations & AI Product Lead **Feb 2026 - Present**
BYU Marriott School - GALS Cambodia Research Project, Hybrid / Phnom Penh, Cambodia (on-site Summer 2026)

- Led a four-person Cambodian field team and coordinated business-training workshops across six Phnom Penh sites
- Improved and supported an AI-assisted revenue-tracking app; trained 200 small-business owners and supported approximately 50 regular users
- Used Codex to build a React, TypeScript, SQL, and Supabase portal for staff recruitment, cohorts, attendance, field visits, contact follow-up, and graduation
- Consolidated roughly 20 spreadsheets into a portal with clearer attendance, cohort organization, and contact follow-up workflows

AI Specialist | Healthcare Intern **Sep 2025 - Feb 2026**
Summit Brain, Spine, and Orthopedics, Lehi, UT

- Built an AI-assisted Python tool to extract structured clinical variables and support a research team's data-collection workflow
- Deployed an Azure-hosted AI assistant in Microsoft Teams that answered employee questions using company workflows and guidelines

Patient Care Coordinator | Part-time **Aug 2024 - Sep 2025**
Summit Brain, Spine, and Orthopedics, Lehi, UT

- Implemented an AI scribe to assist with visit-note drafting and reduce manual documentation work

Product Development Intern **Oct 2021 - May 2022**
Ripple Neuro, Salt Lake City, UT

- Contributed to neuroscience product development from concept to prototype through hands-on laboratory work and cross-functional research and development collaboration

OTHER ACHIEVEMENTS

- President, BYU AI Association (2026 - Present) - Grew average event attendance from approximately 10 to 50+ in two months through advertising and campus outreach
- Full-time Representative, The Church of Jesus Christ of Latter-day Saints, Cambodia (Jun 2022 - Jun 2024) - Led multilingual digital outreach, teaching, and community coordination
- Languages: Mandarin Chinese (Advanced), Khmer (Advanced)
